

ARCHANGEL

*Better Outcomes • Delivered*

# Key Points

- Orders placed in Archangel follow a process flow and change status depending on where the order is in the flow
  - See next page for process flow diagram
- The Triage team exists to ensure patient private insurance (non-Medicare) orders are billable and finds a biller to bill the order
  - The Triage team accesses a network of billers and works to find a biller to bill the order
  - Orders that are ready to bill are picked, packed and shipped
  - Orders that are not able to be billed are eventually cancelled
